## ABSTRACT OF THE DISCLOSURE

A non-mediated enzyme electrode comprises a base substrate

(2) on which is provided an electrically conductive base

1 ayer (8) comprising finely divided platinum group metal or oxide bonded together by a resin; a top layer on the base layer (8), the top layer comprising a buffer. A catalytically active quantity of an oxidoreductase enzyme is provided in at least one of the base layer and the top layer.

The invention also provides a biosensor (20) which includes an enzyme electrode, and methods of manufacturing the enzyme electrode and biosensor.
